

USLEDTM
Always the Right Choice!

COMPANY PROFILE

MORE ABOUT WHO WE ARE

For over 18 years, US LED has been a full-service provider of commercial lighting, signage, and technology solutions. We are a global leader serving major markets including commercial and industrial lighting, office spaces, education facilities, self-storage facilities, multi-site retail, and healthcare. Because of our early history in LED lighting, we have decades of engineering expertise to continuously offer ultra-long-life luminaires that approach or exceed 200,000-hour L70 lifetimes and are backed by an industry-leading Ten-Year Warranty. Much of our product line is assembled in our plant in Houston, Texas.

The accounts we manage today are some of the largest national retailers, property owners, state and local governments, education and C&I entities in the world. Over the last three years, US LED has completed over 13,000 retrofits for various customers in addition to our design build business. We will do over 4,000 national retail locations alone this year. This includes customers like Dollar General, Advance Auto, Game Stop, Fresh Market, CBRE, Washington Prime, HEB, Amazon, Extra Space Storage, and many others. As a manufacturer, we work hand-in-hand with our ESCO and Design Build partners to provide the highest quality in LED lighting solutions. This includes customers like Johnson Controls, McKinstry, Lockheed Martin, Engie, Envocore, Salas O'Brien, and many others. By combining integrated technology, design, and manufacturing with an award-winning engineering team, US LED continues to produce the highest value products in the market through its manufacturing partners. Whatever the project, whatever the budget, we are committed to providing the highest level of quality and service. We look forward to helping you make your lighting projects a success!
